

2026

Magnets Magnetism Sensors and Applications

INNOMAG, the innovation platform for magnetic microsystems, invites you to the first “**MagSense 2026**” event at **Imaginata in Jena** on September 16 and 17, 2026.

With over 50 members from **Germany, Switzerland, Austria, Slovenia, and Sweden**, INNOMAG brings together stakeholders from **research, development, manufacturing, and application**, creating a unique platform for interdisciplinary exchange on magnetic microsystems.

MagSense 2026 is aimed at **developers, manufacturers, and users of magnetic sensor systems**. The focus is on the interaction between **magnets, magnetization, and sensor technology**, as well as their contribution to new, innovative applications.

On both days of the event, participants can look forward to an exciting program of **specialist presentations** showcasing **the latest findings, products, and applications**. At the same time, **INNOMAG** members will be presenting their expertise, technologies, and latest developments at an **accompanying exhibition**.

A special highlight is the evening event on the first day, which—like the exhibition—offers ample opportunity for personal exchange between industry professionals, exhibitors, and speakers.

Registration is now open.

Stay tuned—and mark the date in your calendar now!

Date: September 16–17, 2026

Venue: Imaginata, Jena

Target group: Developers, manufacturers, and users of magnetic sensor systems

The program and list of exhibitors is online
